STOCK MARKET IS DULL ON HIGH MONEY RATE.

CALL LOAN CHARGES RISE TO 8 PER CENT.

Undertone Holds Firm Despite the Slack Business, and Better Things Are Expected Further On.

New York. Oct. 5.—The call loan rate touched the high level of the year at 5 per cent to-day, and the stock market as a whole resumed the appearance of last

touched the high level of the year at 8 per cent to-day, and the stock market as a whole resumed the appearance of last week.

That is to say, trading became dull and constrained, but the undertone held firm. Last week the firmness of the market was generally attributed to the expectation of an early easing of money after the especial requirements for the turn of the quarter and for large syndicate transactions had been met.

In to-day's market, however, there was a perceptible growth of opinion that money rates are likely to be firmly held for some time to come.

In speculative circles, where the talk of the return of ease in money has dealt with days heretofore, the allowance for possible firmness of money was extended to weeks. In this the speculative discussion came into line with the prevalent bank opinion none of which looks for relaxation in money except with the passage of weeks, and in some cases bankers look for months as the period of duration for hisher money rates. In behalf of this opinion bankers assert that a firm money market in New York through the last quarter of the year is a perfectly normal condition. The situation this year, it is pointed out, is calculated to emphasize this condition rather than to relieve it.

Efforts were made in speculative quarters, however, to miticate the influences of vesteriay's flurty in money by attributing it to special causes. The rise to-day to above the rate quoted yesterday rather dissinated the effect of these efforts.

The high rate had the effect, however, of attracting loans from outside sources, and there were large offerings on account of banking institutions at other noints. These funds however, were drawn for the most part from deposits in New York banks.

The effect was the same as the process of transfer of loans from the New York banking institutions from the New York banking the transfer of loans from the New York banks.

PRICES OF LOCAL STOCKS ARE WELL MAINTAINED.

VOLUME OF TRADING NOT LARGE.

Bonds Most Active Issue-Third National Higher.

Local securities were dull, but generally firm in vesterday's session of the St. Louis Stock Exchange. The volume of sales was not large, but prices were good, and there was an undertone of strength discernable. The most active issue was Kansas City Home Telephone 5s. which sold up to \$8.125.

Third National was a half point higher, a small lot selling at \$12.59. National Bank of Commerce was steady at 534. Chicaco Ratiway Equipment was fairly active, selling from \$6.9) up to \$1. at which latter figure 159 shares changel hands.

GERMAN WHEAT PURCHASES HELP TO STRENGTHEN PRICE.

SENTIMENT IN CORN IS VERY BULLISH.

Kansas City Home Telephone Trading in Oats Pit Is More Active Than Recently, and Provisions Hold Steady.

> Chicago, Oct. 5.—Confirmation of German purchases of wheat at Duluth had a strengthening effect to-day on the wheat market here. At the close wheat for Dec. delivery was up 14c. Corn and oats are up 5.00 Me. Provisions are practically unchanged. WHEAT.

changed.

WHEAT.

The wheat market opened firm. Dec. being up 14214c to 14214c at 8414c to 8414c.

From the start commission houses were active hidders, but offerings were relatively small. The principal factor in the situation was news from Duluth confirming reported sales of wheat there for export to Germany. In addition, it was announced that another let had been purchased to-day for German account.

The market here was further strengthened by moderate demand from a leading bull. Weather in the Northwest to-day was exceedingly favorable for the movement of the new crop.

This fact, however, was apparently ignored. After touching 8415c soon after the opening Dec. advanced to 845c.

Small recessions occurred at various times during the remainder of the session, but the leading long, who was a conspicuous buyer early in the day, continued to give the market support whenever necessary to prevent any decline. The close was firm, with Dec. at 845c 8425c.

Clearances of wheat and flour were equal to 35,000 bu. Primary recessions were 1.83.600 bu. compared with 1.83.600 bu. a year ago.

## SUMMARY OF ST. LOUIS MARKETS

Wheat opened a fraction higher in yesterday's local grain market, and remained firm throughout the session. The day, however, proved one of the dullest in many weeks, sales being few and far between. The principal factor in the advance was news that another parcel of No. 1 Northern wheat had been purchased in Duluth by Germany at prices higher than those of Wednesday's sale for like ship Europe increased its bids for Manitoba wheat, and a fairly good general demand existed. Minneapells mills report a good business for last week. There was a brisk domestic demand and the output for the week of September 39 was 43,655 barrels, against 22,500 harrels for the corresponding week last year. Cables were steady and virtually unchanged and receipts about as estimated. Weather in the Northwest continues clear and ideal for handling wheat. Chicago was also firmer, with considerable buying by the short interest. Advices from Russia seem to confirm the crop shortage in that country, and the bulls hold that this will send prices

higher, especially if anything should happen to the Argentine crop.

Corn was also higher, principally in sympathy with wheat and the general firm tone of the market. Armour was reported as buying in Chicago. All news, however, was decidedly bearish. The weather in the corn belt was favorable for maturing the crop and a record-breaking yield is a practical certainty. A high per-

entage is good to excellent quality. Dec. wheat opened % 1/2 higher and closed 1/21/c higher.
